The Authority has not adopted an investment policy, however they informally follow the Town/Village policy.</p>

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Harrison Parking Authority, New York's (A Component Unit of the Town/Village of Harrison, New York) (the "Entity") internal control over financial reporting ("internal control") as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control. Accordingly, we express no such opinion.

Professional standards require that we communicate to you, in writing, all significant deficiencies and/or material weaknesses in internal control that we identify in performing our audit. For this purpose, deficiencies in internal control are categorized as follows:

- A **deficiency in internal control** exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis.
- A **material weakness** is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis.
- A **significant deficiency** is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph and was not designed to identify all deficiencies in internal control that might be deficiencies, significant deficiencies, or material weaknesses and, therefore, there can be no assurance that all such deficiencies have been identified.

We did not identify any deficiencies in internal control that we consider to be material weaknesses, as defined above.

This communication is intended solely for the information and use of management and others charged with governance and is not intended to be and should not be used by anyone other than these specified parties. We will be pleased to discuss these communications and comments in further detail at your convenience, or to assist you in implementing the recommendations.

Other Matters

- **Cybersecurity Best Practices**

The Government Finance Officers Association (“GFOA”) recently published an article entitled “*A Byte of Prevention: Best Practices in Cybersecurity*” to help guide local municipalities in implementing simple, inexpensive and effective strategies that address people, processes and technology to protect organizations from potentially costly and damaging cybersecurity threats. As stewards of sensitive public data, municipal officials and finance officers must understand the significance of this threat, including the large costs governments face in recovering lost data, restoring public trust and recovering from a breach. Most of these ten “best practices” recommendations address the weakest link in cybersecurity – the human factor.

1. Employee Awareness – Train employees to:
 - Be suspicious of emails asking to change a username or password
 - Double check the sender’s email address before opening attachments or links
 - Periodically check the website haveibeenpwned.com to see if their e-mail addresses and passwords have been exposed. If so, employees should report the breach and change passwords for the accounts listed
 - Follow the government’s compliance processes when vendors request changes to payment and bank account information (e.g., accounts payable) and staff members (e.g., direct deposit). These are often “out-of-band” (i.e., not done by e-mail) and are therefore vulnerable
2. Patch Digital Devices – Software patches typically include security updates and fixes for vulnerabilities
 - Ensure that all devices (computers, laptops and smart devices) are updated
 - Do not allow personal devices on government networks
3. Anti-Virus Software
 - Install anti-virus software on all devices and run a full scan at least monthly
 - Update anti-virus software regularly
 - Scan mobile devices before they connect to the network
4. Virtual Private Network (VPN) – Encrypts data and sends it through an established tunnel that can only be accessed from an encrypted key at both ends
 - Give all remote workers VPN access.
 - Don’t use unsecured public wireless networks if you can help it. If you can’t, use VPN, which can be set up by your IT administrators or outsourced to third parties
5. Password Security
 - Develop a policy for strong passwords (i.e. one capital letter, a number, a symbol and a minimum length)
 - Require changing of passwords at set intervals (i.e. monthly/quarterly)
 - Train employees about safe social media practices

Other Matters

- **Cybersecurity Best Practices** (*Continued*)

6. Administrative Access Controls
 - Implement multi-factor authentication for all administrator accounts (network as well as cloud)
 - Limit the number of administrator (or even super user) accounts as much as possible
7. Physical Security
 - Activate time-out functions so the session logs out after a certain amount of inactive time
 - Activate biometric security (finger print readers/facial recognition software) where feasible
 - Actively manage laptops and smart devices so the information can be erased if device is lost or stolen
 - Use anti-theft software on mobile devices.
8. Back-Up and Disaster Recovery – Preferably at offsite locations separate from your operating network
 - Develop back-up and disaster recovery procedures
 - Ensure that all sensitive data are encrypted.
9. Policies and Procedures
 - Develop policies and procedures that address the use of technology and safe handling of data
 - Procedures should include 1) what staff members are expected to do as “first responders”, 2) what the “incident response team” members should do and 3) the communications your public information office should make
 - Conduct regular exercises to prepare for responding to cyber threats, which should be part of regular disaster recovery training
10. Consider Cyber Insurance – Generally covers costs associated with hardware replacement, professional services, protecting third parties and cyber ransom
 - Check with your insurance provider about cyber insurance offerings
 - Consider a cyber-security risk assessment (which PKF O'Connor Davies specialists can assist you with)

This representation letter is provided in connection with your audit of the financial statements of the Harrison Parking Authority ("Authority"), New York, (a component unit of the Town/Village of Harrison, New York) as of December 31, 2022 which comprise the respective financial position and the respective changes in financial position and, cash flows for the year then ended, and the disclosures (collectively, the "financial statements"), for the purpose of expressing opinions as to whether the financial statements are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.
