TO: Harrison Town Board / Fire District # 2 Commissioners

RE: Transfer of Budget Funds

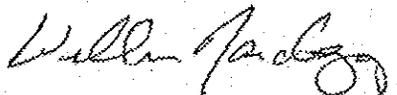

The Harrison Fire Department, District # 2 is requesting to transfer funds in the amount of \$ 7,922.00 from the Fund Balance to budget line 11-3411-100-0240 Other Equipment.

The Fire Department uses Scott 4.5 Air Cylinders for the Self Contained Breathing Apparatus (SCBA). As per NFPA and OSHA, after fifteen years from the date of manufacture, these cylinders can no longer be used. For 2012 and 2013, twenty-two cylinders have been taken out of service. This leaves the Fire Department significantly lacking enough air cylinders to provide fire fighters with breathing air during emergency operations.

The Fire District 2 budget for 2013 included money for ten cylinders and five complete air-pacs. That purchase has been completed. The fund transfer would allow for the purchase of ten additional cylinders at contract pricing of \$ 792.12 each for a total of \$ 7,922.00.

Thank you for your attention to this matter. I am available at any time should you require further information.

Respectfully Submitted,

William Nardozi
Assistant Fire Chief
