Re: Renew WeatherWorks Contract for 2023

Authorization to approve the renewal of the contract with Weather Works, a complete forecast and storm alert service. This system has been used by the Town of Harrison over the last year to deliver accurate and timely forecasts to our DPW, Police, and Emergency Services, with outstanding feedback. The yearly cost is \$1,650 and funding is available in Budget Line 00-1900-100-4407, Town Fund Special Services.

Attn: Chelsey Bush
RE: 2023-24 Weather Service Renewal Agreement

Dear Chelsey,

We are pleased to present you with your weather service renewal agreement effective on **January 15th, 2023** for a one-year period. Please promptly review and electronically sign your agreement so that your account remains active and up to date. If you need assistance with the services provided on your renewal contract, please contact [sales](#). For any billing related inquiries, contact Cindy Masotti in our [accounting](#) department at (908) 850-8600 x122.

I want to personally thank you for your continued partnership and trust in WeatherWorks. Our meteorologists and support staff remain focused and dedicated in offering you the highest level of meteorological services so that you can effectively manage weather related threats. Many thanks for the continual feedback you provide to our organization whether it is through our client surveys, one-on-one conversations, and/or email. Our 35 years of success is a result of your continued loyalty and support each year so that we can continue to make data-driven decisions as it pertains to enhancements in existing services as well as new and reliable product offerings.

Last year, we successfully launched our "Making Weather Work for You" webinar series aimed offering more education and tutorials for clients. In addition, we added our new VeriFreeze™ upgrade as an add-on to your Certified Snowfall Totals® account. This was highly received by clients and offered a useful means to document the formation of ice due to standing water or refreeze throughout the winter season.

Below are some of the upcoming developments at WeatherWorks for the coming year:

- Predictive Pavement Temperatures (Offered as beta service for 2022-23)
- Expansion and more efficient platform to support our snow and ice climatology database & Snowistics®
- Enhanced RADAR imagery for interactive maps both online and mobile app
- Additional hiring of qualified meteorologists and strategic support staff

Thanks again for all of your support. WeatherWorks remains an active participant in various industry conferences and trade shows each year. You can always find the latest scheduled shows, product enhancements and new services in our monthly newsletters and on social media outlets. Please do not hesitate to contact me anytime you have questions or concerns.

Always at your service,

Frank Lombardo
CEO of WeatherWorks, LLC

Included Services

Storm Alert - Weather Service Package

\$1,650.00

FORECAST REGIONS:

South Westchester, NY

COMPLETE YR ROUND FORECAST & STORM ALERT SERVICE

\$1,650.00

WINTER STORM ALERTS

Storm alerts are issued to contacts up to 48 hours prior to the anticipated arrival of any precipitation containing any combinations of snow, sleet or freezing rain. Alerts are transmitted as designated by the client (email, fax and/or mobile app) and provide details on anticipated start, end, intensity, accumulation confidence, pavement accumulation, first inch timing and any critical hazards that may affect your winter operations. Written updates are at the discretion of the meteorologist on duty but often vary from 1-3 updates per day through the duration of the event.

WARM SEASON STORM ALERTS

Storm alerts are issued to contacts up to 12 hours prior to the anticipated arrival of any severe thunderstorms storms containing damaging winds, hail, tornado potential and/or flooding rains or 24-48 hours prior to tropical systems and hurricanes. Alerts are transmitted as designated by the client (email, fax and/or mobile app) and provide details on anticipated start, end, intensity, precipitation totals and any critical hazards that may impact your warm season operations. Written updates are at the discretion of the meteorologist on duty.

24/7 TELEPHONE CONSULTATION

Unlimited telephone consultation with a meteorologist is always available at WeatherWorks for real-time verbal updates and so that we may address your weather-related concerns throughout the year. The service may be accessed by designated personnel only and is limited to 1 primary contact and a backup unless otherwise specified in the contract. Consultation accessed via our exclusive briefing line and customized pin.

HEADS UP NOTIFICATION

Never miss an event or respond too late! Rely on our staff of 30 professional meteorologists to monitor your locations 24/7 and provide zero tolerance call-to-action notification to designated contacts via mobile app, text message or email 1-3 hours prior to the onset of accumulating snow or ice or up to an hour in advance of severe weather. For the mobile app option, you must download the WeatherWorks mobile app from the Google Play or Apple Store and link your device to your online settings to receive the notifications.

DAILY FORECASTS

5 Day forecasts are issued year-round (12 months), Monday through Friday and contain a narrative synopsis of the expected weather pattern and a detailed breakdown of each day's expected weather. Forecast components include anticipated sky cover, precipitation threats, high / low temperature, wind, potential for re-freeze or freeze up conditions (during winter) and potential for severe weather (warm season).

LONG RANGE FORECASTS

Components of the service include a blog discussion from our long range meteorologist, an in-depth long range pattern discussion and a predictive outlook for 3 periods extending out to 2 months. Forecasts are updated bi-weekly online (approximately 2 times per month).

ONLINE WEATHER CENTER

Administer your account, contact settings and access services with a secure login online at weatherworksinc.com. Your weather web page will provide access to a visual of your forecast region(s), relevant forecasts / storm alerts, as well as some weather resources including but not limited to radar, local weather observations, drought conditions, river data, sunrise & sunset, tropical outlook and any special requested weather links.

MOBILE APP

Maximize the value of your WeatherWorks Storm Alert service and download our app (keyword search "WeatherWorks") on your Apple or Android mobile device to consolidate and access your WeatherWorks products and services. Make sure you are a

contact your account page on the website or contact your account manager for more information.
contact in your company settings online, applied to the forecast region and then follow the instructions to link your device.

WEATHERWORKS PUBLICATIONS

Stay informed of upcoming conferences and the latest developments at WeatherWorks with our emailed "Weather Tracker" monthly newsletter. Additional special publications include but are not limited to our seasonal Winter Preview Series, Winter Review, Summer Outlook and Hurricane Forecast. WeatherWorks will notify the client of any associated costs prior to completing the work but generally our Past Weather Reports and/or additional requested research into prior events can be conducted at our client rate of \$75 per hour. We offer a 20% discount off our standard and multi-location rates for all requested Snowtistics (climatology reports).

CERTIFIED SNOWFALL TOTALS (CST) & VERIFREEZE

Access to the Nation's leading snow and ice verification service. All post storm snow and ice reports are quality controlled, prepared, certified for accuracy and published online at CertifiedSnowfallTotals.com up to 48 hours after the conclusion of each winter event. Reports include a narrative description of the storm event with pertinent details on timing, temperature, wind, etc and zip code resolution totals to the nearest 0.1 inch. Includes full export options, custom filtering and access to individual storm events and cumulative monthly / seasonal totals. Our optional VeriFreeze service can be added to your locations to assist with the verification of daily refreeze and ice checks. The per unit rate applies after your allotted credit has been used on your account each year.

* Please refer to your account page on Certified Snowfall Totals for your allotted credit included in the storm alert package.

Total: \$1,650.00

Upgraded Services

** Check off each optional upgrade you wish to include in your service agreement*

☐ **WINTER RISK**

+ \$325.00

Maximize your winter preparedness plan and stay in budget with our comprehensive winter season long range forecast service. Components of our on-line Winter Risk include: Our "Storm Tracker" section provides a detailed 6-14 day outlook and pattern / model discussion pertaining to all potential developing winter events, storms and tracks. This is followed by a week 3 and 4 risk based assessment of projected salting, plowable and extreme events and is finished with monthly projections through the duration of winter. Storm tracker updates 2-3 times per week and weekly for the other components.

The Client shall pay WeatherWorks the contract total shown above, plus any additional cost associated with selected upgrades. All information exchanged between WeatherWorks and the Client shall be treated as confidential between the parties. Duplication and/or distribution of WeatherWorks products and services to other entities is strictly prohibited without the approval from WeatherWorks in advance. The Client acknowledges that WeatherWorks meteorologists strive for the highest degree of scientific rigor and care in preparing forecasts and/or providing meteorological data and/or consultation services to the Client. Recognizing that weather forecasting is inherently not a precise science, the Client understands that the Client is solely responsible for action or lack of action taken to preserve life or property and for possible adverse financial consequences arising out of the Client's or its customers' use of WeatherWorks data or forecasts. WeatherWorks and its employees will not be held liable for weather-related incidents or any type of loss arising out of use of WeatherWorks data or forecasts. Either party may terminate this service agreement by giving at least thirty (30) days notice in writing.
