Sub: Section 228-12 Harrison Town Code, Subsection D
Sewer Rent Question

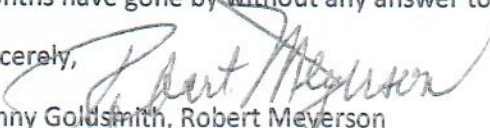

To whom it may concern:

For the past 43 years I have owned a pool at my address. For the same amount of time, I have been paying the water bill for my home. Recently our pool was reconditioned. To do so we had to completely empty it. When the construction was finished, we paid for truck delivery of water to fill it. After the season we had to make some adjustments and to refill about a foot of water during May of 2019.

If one would look at our water usage for the months of December thru April of any year, you would see a consistent usage of much less than the time period of May thru November for each year. Our sewer charge has jumped about \$25 per month since or about \$300 per year because we topped off our pool three weeks before you recalculated our sewer charge.

We respectfully ask for a refund from our original charge to the most current bill and an adjustment for future billings. The original water Bill invoice was dropped off at the Engineering Office with a note and months have gone by without any answer to our situation until Ms. Carapella Rendo sent an email to us.

Sincerely,

Penny Goldsmith, Robert Meyerson
