Re: Emergency Storm Drainage Repairs - Beverly Road and Highland Road

Dear Supervisor Belmont and Members of the Town Board:

Due to the intense rains of April 16, 2018, the Beverly Road/Highland Road area experienced flooding which inundated the Beverly Road roadway and surrounding properties with water. The flood waters made Beverly Road impassable and filled the lower levels of adjacent homes.

In observing that the flood waters did not recede after the storm and the condition of various drain inlets, it became apparent that the outlet pipe which runs off-road to a brook was fully obstructed. The existing location of this off-road pipeline traverses properties of 9 Highland Road and 5 Dorchester Road. Previous experiences and attempts to maintain this pipeline have been largely unsuccessful and it had become clear that the pipeline had to be excavated in order to remediate the obstruction(s).

In order to correct each deficiency and make proper connection from the drainage system within Highland/Beverly to an appropriate outlet, approximately 300 lineal feet of 24-inch pipe and 4 manholes are being installed.

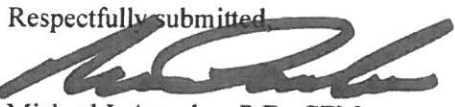

This letter serves as a request to the Town Board to formalize the emergency authorization to hire ELQ Industries to perform the above referenced work at an estimated cost of \$200,000.00.

Further authorization is requested for the Purchasing Department to issue a Purchase Order an amount not to exceed \$200,000.00 payable to ELQ Industries.

Finally, it is requested that the Board identify a funding source for this work.

I will return before the Board at the commencement of the work should additional funding be required.

Respectfully submitted,

Michael J. Amodeo, P.E., CFM
Town and Village Engineer
